Overview

Meagan Walling joined Edell, Shapiro & Finnann in 2021 and has been a patent agent since 2007, specializing in patent preparation and prosecution. Meagan received a Bachelor of Engineering degree with a focus in electrical engineering from Vanderbilt University. Meagan's practice focuses on a wide range of electrical and mechanical technologies with a focus in networks, mobility, and telecommunications.

Meagan specializes in a wide variety of technologies, including:

- wireless and network communications
- IoT-related technologies
- mobile communications systems
- computer hardware and software
- telepresence-related technologies
- imaging processing and display technologies
- artificial intelligence/machine learning algorithms and systems

Meagan began her career in intellectual property at the U.S. Patent and Trademark Office working as a Patent Examiner. Following her time at the USPTO, Meagan prepared and prosecuted patent applications at two boutique intellectual property law firms in Virginia. Meagan has represented a variety of small, mid-sized, and large companies and has prosecuted patent applications in a number of different countries.

In her free time, Meagan enjoys reading, traveling, hiking, biking, and spending time with her husband and two children.
