Overview

Paul Houck joined the firm in 1991 and provides our clients with high-quality patent and trademark drafting services. With extensive patent and trademark drafting experience, Paul has the creativity, skill, and insight to bring invention and trademark representations to life.

While Paul's drafting career spans from an era when illustrations were produced by hand at the drafting board, he currently uses cutting-edge 3D Computer Aided Drafting (CAD) software to create our drawings. Paul's familiarity with our clients' technologies allows him to work collaboratively with our attorneys to ensure that our renderings are as thorough and accurate as possible.
